

Mouse Blaster

~PATENTED LIGHT WAVE PEST REPELLER TECHNOLOGY~

The patented **Mouse Blaster** is designed to repel nocturnal animals, like the rat, who are more active at night than during the day. It is perfect for rooms, kitchens, offices and other similar venue suffering from rat problems. Laboratory research has shown ultrasonic sound waves and green light wave attack the auditory and vision of most common pests causing them pain and confused. This advanced generation will let pests give up their source of food as well as shelter and move on more efficiently. Most importantly, the patented green light wave brings this product a high level of performance.

The **Mouse Blaster** will not interfere with television, radios, electronic burglar alarms, fire or smoke detectors, pacemakers, hearing aids or other electronic equipment. Do not harm humans and pets, either.

FEATURES

- **Patented Green Light Wave:** The specific green light wave causes interference to rat's central nervous system and then rats confuse day with night.
- **Indicator Light:** When you plug the **Mouse Blaster**, the two indicators on the front of the unit will light up.
 - The Orange Light will stay on constantly- indicating the power is on.
 - The Green Light will flash rapidly- indicating the ultrasonic sound is working.
- **Green Light Switch:** To adjust the green light switch, locate the switch on the left side of the unit. You may set the light to either "Off", "Sensor", or "On".
 - "Off" disables the green light.
 - "Sensor" activates the green light only when the lights in the room are turned off.
 - "On" keeps the green light turned on all day and night.

USAGE

Remove the **Mouse Blaster** from its packaging. Plug your **Mouse Blaster** into an available wall socket. We recommend plugging it into the socket closest to where you are seeing the pest problem. For optimal coverage, plug a unit in each room without anything blocking or covering the device or move its place per certain period of time. The **Mouse Blaster** is capable of getting rid of pests and preventing future invasion without using dangerous toxic chemicals, poisons or traps! It is normal to see a slight increase in the amount of pests during the first few weeks after installation. The pests are simply being flushed out of the walls and their hiding places, and will soon disappear all together.

SPECIFICATIONS

Dimensions:	110 x 70 x 50 mm
Weight:	112 g
Power supply:	AC110V 60Hz
Frequency range:	20,000-32,000Hz
