

# Dust Mite Controller

## How it works:

Dust mites are affected by the constantly changing acoustic ultrasonic sound waves emitted by the unit. The environment becomes hostile and uncomfortable thus affecting the feeding and reproductive cycles.

## About the sound waves:

These high pitched sound waves are ultrasonic in nature and impossible for humans and even pets to hear. Whilst pets can hear some lower frequency ultrasonic sound waves they are not affected by the Dust Mite Controller.

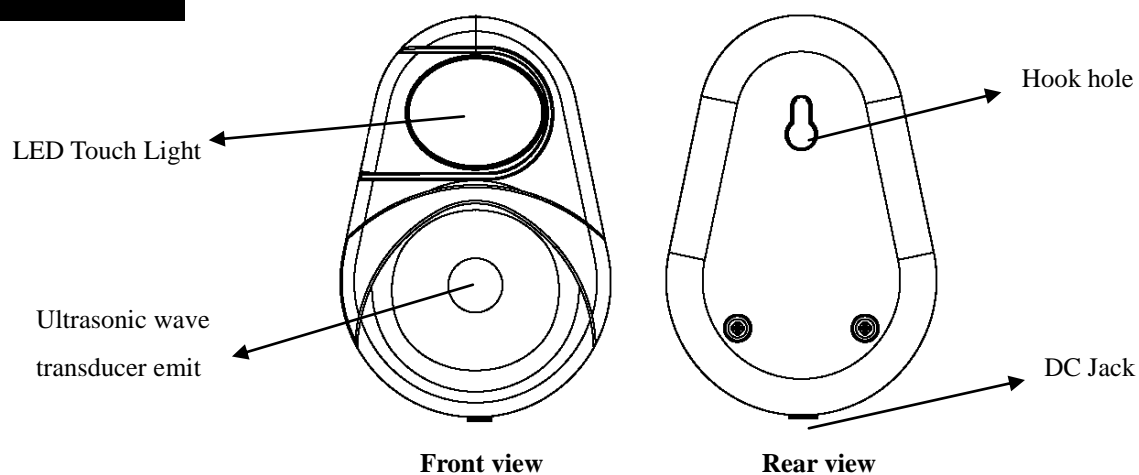

## About the LED Touch Night-light:

This product is a little pretty decoration for the bedroom, and the color of the LED light gives eye the pleasing light in a dark. Once it is plugged in, the dim Blue LED indicator will light up automatically in dark. After pushing the LED lamp, the brightness Blue LED can be lighted up for in illumination.

## Directions for use:

The sound waves produced by the Dust Mite Controller cannot travel through walls the waves are bounced off walls etc. they are absorbed by soft furnishings so place unit in an unobstructed position, for best results do not place behind furniture, curtains etc. Allow up to two weeks to see results. However, the conditions in the room or area will continue to improve it will take six months to reach full effect. Continued use and the dust mite population will be kept to a minimum.

## Directions for use:

## Specification

- Power Supply: AC 230V 50 Hz (AC Adapter Included)
- Size: 10.9 x 7.5 x 3.3 cm (4.29 x 2.95 x 1.3 inches)
- Weight: 72g (2.54 oz.)
- Ultrasonic Wave Frequency Range: 40 KHz  $\pm$  1 KHz
