

Bark Free User's Manual

The Bark Free is an excellent way to train a dog not to bark. It is unlike any other dog training device out there. The Bark Free is a powerful and compact unit, with a sleek space saving design. It has two flip out feet to stabilize the unit so it can stand alone, or with its built in bracket, it can be hung from a wall, fence, tree or post.

- A - Sensitivity Dial
- B - Frequency Switch
- C - Fold-Out Feet
- D - Audio Speakers
- E - Indicator Light (Audio)
- F - Indicator Light (Ultrasonic)
- G - Sensor
- H - Ultrasonic Speaker
- I - DC Jack
- J - Mounting Hole
- K - Battery Cover (9V)
- L - AC Adapter (6ft)

- **Sound Sweep** : Sweeps through a wide range of sound, designed to target each dog with the most effective frequency while ensuring the dog does not get used to the sound.
- **Bark Recognition** : Detects barking over other sounds and automatically triggers powerful, high pitched frequencies every time the dog barks.
- **Power Options**: Your choice of 9v Battery (not included) or AC Adapter. (included)
- **Sound Range**: The Bark Free detects barking up to 75 feet away. Our High Pressure Transducer pumps out sound that can be heard up to 300 feet away – over 500 percent further than others.
- **Portability**: The Bark Free can be used both indoors and outdoors and fold out feet and built-in mounting hole on the back so you can hang it anywhere.
- **Dimensions**: 12.5(L) x 17(W) x 3.5(D) cm
- **Audio Output**: 120db
- **Weight**: 1 lb (2 lbs with AC Adapter)
