

Feature & Component

- 1 Main unit
- 2 DC cigarette plug
- 3 AC adapter
- 4 Anti-slip mat
- 5 Frame
- 6 Rechargeable battery

Effect

Before

After

How to use

1. Put rechargeable batteries into compartment on the back. (Ensure positive and negative level correctly.)
2. Install frame under purifier and set in car or area you want to remain air fresh.
3. Press ON/ OFF switch in front of purifier to turn it on. Power indicator light will be lit.
4. Rechargeable batteries can be charged by AC power, DC power or solar panel (optional).

How to charge

1. AC power charging: Connect AC adapter with AC socket.
 2. DC power charging: Insert DC cigarette plug into car cigarette outlet.
 3. Solar panel charging: Connect with solar panel (optional).
- ※ AC power is used primarily when AC plugged, no matter what connection is applied at the same time.
