

Triple Threat Pest Repeller

We can help you SAY NO TO PESTS.

It is time to clean up your life!!!

Triple Ultrasonic Speakers

It delivers triple ultrasonic frequencies compared to others on the market. The sound wave is above our hearing level but is still audible to insects. It disrupts and irritates insects and pests from their habitat, which forces them to move away.

Side Switches Option

The top switch lets you adjust the frequency

- 🔊) "High" for areas within 330m²
- 🔊) "Mid" for areas within 265m²
- 🔊) "Low" for areas within 200m²

The bottom switch lets you set the night light to either  "Off",  "Dim", or  "Bright".

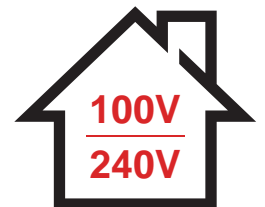

Insect Resistant Night Light

Insect vision is different from our vision. Insects are attracted to the UV spectrum of light. Conventional incandescent lights transmit light that is in the UV range, so bugs and insects are attracted to it. The Insect Resistant Night Light transmits almost no UV range light, therefore bugs and insects are not attracted to it.

Universal Power Supply

The Triple Threat Pest Repeller supports AC power from both 100V and 240V, suitable to use for all of the world.

Specifications

Frequency Range: 14KHz-40KHz
Output Sound Pressure: >95dB
Power Supply: AC100-240V 60/50Hz
Dimensions: 15.4cm x 6.6cm x 5.8cm
Weight: 108g
